PRICE 1d.

No. 21,256. Registered at the General Post Office, Sydney, for transmission by post as a Newspaper.

For Notices of Births, Marriages, Deaths, &c. See Page 12.

SUMMARY.

Most alarming reports continue to come from San Francisco.

Bridadier-General Funston telegraphed on Thursday morning that the city was practically isolated, and that the situation could not be worse.

Congress has voted a million dollars for the relief of sufferers. Rations are also being supplied.

The destruction extends over a radius of 10 miles from San Francisco.

The Majestic, Orpheus, Columbia, and other theatres collapsed, and were burnt.

Many of the richest banks and commercial houses in Montgomery were burnt.

Hundreds of thousands of dollars in the debris.

Chinese and Japanese quarter are in ruins. The inhabitants got into a state of panic, and rushed madly about the streets, beating gongs.

Ten thousand frantic Chinese and thousands of Americans, Spaniards, and Mexicans fought in the streets.

Many blocks were dynamited during the night, but the flames overcame all attempts, and the firebrand abandoned all hope of control.

The fashionable suburbs of Malo Park, Burleigh, and Nob Hill have been destroyed. Most of the towns around the bay suffered.

The newspapers combined in the issue of a single print from the "Chronicle" office until that building collapsed.

Among the buildings destroyed were the house of Mrs. H. C. Moore, the Mathematic School, and the Mark Hopkins Art Institute.

Two hundred thousand people passed Wednesday night in the park, and probably 300,000 spent Thursday night in the same manner.

The city had only three days' food supply, and a famine is feared. Prices have trebled.

The sale of food is regulated, and the rich are prevented from making large purchases. Thousands wait while the soldiers distribute water.

People are half dead, but are calm.

Local reports say that the casualties have been confined to the poorer tenement section.

It is impossible at present to trace individuals, but Englishmen and foreigners staying at large hotels are safe.

Two ladies mentioned, Mrs. Hermann Octagon, and Mrs. X. V. Anderson, residing in New York, have been ruined by the disaster.

President Roosevelt has appealed for private contributions.

Wall-street suspended business to arrange for relief. Railways are conveying supplies free.

Enormous contributions have been received, including 100,000 dollars from Mr. J. D. Rockefeller.

A Thursday afternoon a telegraph operator at Los Angeles wired that the offer was "rocking like a boat," and the message ceased.

The Mint, containing \$50,000,000 dollars, was used for desperate efforts on the part of the employes.

The Pacific squadron is safe at Long Beach.

Over two-thirds of the city has been destroyed, and there is no possibility of saving the remainder.

A hundred million dollars' worth of securities were stored in the deposit vaults in the burnt-out banking quarter. Their fate is unknown.

According to the latest estimate, the deaths number 5000. The damage is assessed at \$600 million.

The National Federation of Classes requires all denominations to observe Sunday as a special day of intercession for suffering.

It was decided at noon to dynamite all residences on the hillside of Van Ness Avenue for a distance of a mile. This includes a most fashionable quarter.

Messages of sympathy with the sufferers in the San Francisco disaster have been sent by the Governor-General, the Prime Minister, the President of the Senate, the Speaker of the House of Representatives, and others.

Mr. Robert Brough, the well-known actor, died yesterday afternoon.

H.M.S. *Sirius* arrived last night from San Francisco via Auckland. Her mails will be distributed this morning.

THE LOVELY AQUILEGIA,

ANDERSON'S SUPERB MIXTURE

NOW THE new type of the Aquilegia are almost established to RANK AS NEW FLOWERS; they are certainly a totally different class from the old ones.

THESE are an effort to give them a more charming effect—more delicate, more graceful, more beautiful.

WE do not know a more charming class of flowers than these. They are delicate, from seed, and PLENTY OF WATER IN THE PELLET. They are easily grown, and all amateurs to grow the new Aquilegia.

Superb mixture of Selected Long-spurred Single Varieties, 6d per pt.

Choice Double Flowering Sorts, 6d per pt.

See Coloured Front Cover of Novelty List for 1906, Post Free.

See General List and Catalogue for other Varieties.

EVERYTHING FOR THE GARDEN.

(Bodman, Plant Merchants, 160 Gloucester, Sydney.)

ANDERSON AND CO.,

SWEET PEAS OF BEAUTY!

Many people think a garden is incomplete without Sweet Peas. These are the finest strains we can buy.

The Amalgamated Society of Railway Employees, at their annual conference endorsed the proposal of Mr. William Collier and his company to open a school for the sons of men who have given their lives for Australia on the morning following the disaster.

The Tariff Commission yesterday required inquiry on the subject of the proposed tariff, any interference with the tariff, and said that if one were necessary it should be as low as possible.

Another jeweller stated that local manufacturers would certain classes of work, but had not the finish of English and Continental specialists.

The Tariff Commission goes next to Brisbane, and will return to further evidence in Sydney about June 24.

George Hippisley, a youth of 18, was sentenced to death at the Goulburn Circuit Court yesterday for the attempted murder of his son, Francis.

It was shown that the prisoner fired four shots at Murrow with a pea rifle, intending to shoot his body into a well.

Hippisley's motive was the desire to get possession of a bicycle.

Inquiries are being made regarding the well-furnished residence of Mr. and Mrs. Hippisley, who have been in San Francisco during the earthquake.

A disastrous fire occurred at Narrabri yesterday evening. Five buildings suffered, and the damage is estimated at \$5000.

The reflection of the fire was seen at Gunnedah, 54 miles distant.

The town crier, who is deaf, had a narrow escape from being burned to death.

The Narrabri fire has drawn attention to the need of a fire brigade in the town.

An Irish Home Rule meeting was held in Perth on Thursday evening.

The motion will be forwarded to the Secretary of State for the Colonies.

The visiting Japanese squadrons had left Sydney, bound for Townsville.

Mr. Watson, leader of the Federal Labour Party, will shortly conduct a campaign in Western Australia.

Six thousand pounds has been included in the Queensland Estimates for the Brisbane Flood Fund.

Mr. Deakin is delighted at the settlement of the Murray waters question by the States interested.

The conviction of Douglas McLeod at Kalgoorlie on a charge of an offence against a girl, 12 years of age, has been quashed by the Full Court.

Sensational prices were realized yesterday at the annual sale of thoroughbred yearlings at the studs.

The sale is the largest ever held in Australia, 217 horses being sold for \$1,565 guineas.

A sub-committee has been appointed by the South Coast Agricultural Societies' Union to consider the question of the "Sydney Morning Herald" and "The Mail" milk-testing conditions.

There was a fall in maize yesterday, but other lines were stationary.

The grain market yesterday Barrier silver share rose a shilling easier.

A good amount of business was recorded in investment stocks.

A PROGRESSIVE DIETARY.**SUITED TO THE GROWING DIGESTIVE POWERS****THE "ALLENBURYS"****FOOD.**

The "Allenburys" Milk Foods are as easy of digestion as natural milk, and promote both vigour and health.

They provide a pure milk diet for the young infant, and will be found especially suited in hot climates.

WHEN THE RAINS CAME. PRESERVING THE TREES.

HELD UP!

BY RANDOLPH BEDFORD
ALL RIGHTS RESERVED.

Thirty miles a little north of east of Mount Bullen is Fossillbrook, and four miles further west is another town, called Lynd, built also of sand and water, with cyclones and floods roar and floods and wash rain ahead I went to Fossillbrook, the Lynd was up and roaring. So at Fossillbrook I sat down to wait the falling of the river, and waited three days.

At Fossillbrook there is a considerable creek, which is permanent in that country where much bigger rivers are dry; because it is fed by springs which discharge water into it with a thunderous roar. There is a white man's store and a Chinaman-owned store, a Chinaman's garden, a public-house and post-office combined, and another licensed house.

The men of Fossillbrook rarely wear boots when "in town," and never when streaming for tin, so that the habit of bare footedness is broken only by journeys from the drifts of the tin-fields, or by the necessity of the government water. Fossillbrook terminates the red soil country that begins on the western bank of the Lynd. Little tongues of black soil country come up from the creek to tell the adventures of the porridge pots further west, small islands of basal "boaters" rise out of the gluey soil, paving it irregularly, as with cobbles.

The cicadas and the crickets noise without pausing; when the sun shows the sun shows incandescent, the plants like trees and grasses were motionless, but growth growth—was shown in all the climbing creeping plants, and the big pink lilies like fiery stars growing on the banks of Fossillbrook; an indecent speed in the road to maturity; a gross fatness in stalk and leaf of every plant and every bloated vine. Specie grass that was a soft crop of green grass, was a solid crop of yellow for a fort-night ago has grown to nearly a foot, and is unshaking the lance that shall carry the barbed spear stop not six weeks from now. And insect life in every shape and stage came from every crevice of every tree, from every bark fragment, and under every stone, spire, and bead, and burst, and bone, and worm. The most grotesque come later, when the big yellow spider has his tough web of raw silk spun between trees to catch them in the leaf; but the insects, and the bugs, and the bush, begin to make life in the sun, a horror for six long weeks. The earth broke into bloom of poison pea and rosella, and over the earth, the warm rain frayed the ground, the only clean sound was that of the waters coming down the Fossillbrook, and to the shore, and very far away.

The hotel at "the brook" is made of the nests of the white ant. Crushed and sieved to throw out organic refuse, no better feed for the ant than sand, and the sand, and the "brook" hotel is not built that way. The builders were weary men and did not trouble to crush and mix the sand, but the sand of the ant hills hills were packed 27 long and 6 feet square, wetted the faces, and so cemented the sections of nests into a wall 8ft high and 6ft square. The ant hills were left intact, and in these tortuous cells bees and wasps came to live. It was at first annoying to wake up of morning to find a wasp on the pillow, but the next morning the most picturesque tree-squatters had built their nests in the walls, and about the pillow, and going in and out at the holes in the wall, but usage is quick in operation in a quick man, and "the wasp" was soon a familiar name to the house-holds around.

Every morning went one to the river, flushed out to see if "she" was still there, and if she was "a dashed sight worse." And immortal old men, the fathers of all tin streams, came into Fossillbrook, and in the company of the tin miners, and the return of a Homeric fight at Burkstone in 1897.

There was a quaint low-eyed man—a giant through ignorance, who had seen three score and ten years, "had no soap for his hands, and when he didn't feel well, mister, I so came into town yesterday, an' got a fill o' rum an' I'm better this morning, I'm not so bad now, but I know anytide you'd found guilty of destroying one of the guns would probably be treated as insane."

His features were still expressive of energy; in muscularity and in face, was Michael Angelo's David, and the hand which was broken was broken. He was a red-nosed man, who said that his name was Bob McGraw, began to argue on certain geological features of the country, and from the time of his return, his grievance against all men, because he had been underpaid in a contract for six post holes, or adzed wood, which the two-up school quarrelled raucously in many languages and their corruptions: a man with metacarpal shaped like waders, and who had a hole in his foot, as though a man as ever went barefoot, "a simile which has come into the language for ever, and will be used by posterity."

I was on my way home, when I came from the hotel, and in the temporarily fallen break and wallow in the yellow water, and listened to the night noises, and the rain, and the noise of the wind, and the rain, there was no change. I achieved a backbreaker fever, and lived for five days on quinine and milk, and was chucked into irons.

One day we had rain, and knew that the river had answered "impossible," without being questioned; to find a dreary interest watching for comets, and the rising of the river, or fall of the rock, and gauging from such measurement, the state of the river for 50 miles around; to eat without relish in the city, and the water jug; to regard the clouds narrowly and speculate on the certainty of more rain—while the two-up school was broken, and that the axe must go before the plough or the pick and shovel. Granted that habitats must spread in order to live, but it is necessary to destroy the native trees stock, and barrel? Why cannot a selection be made for preservation, in order to save the trees? The boys who have to earn their bread and butter at an early age, let us have the primary school solid in its teaching of the bread and butter, and the boys who have to earn their bread and butter, and the axe must go before the plough or the pick and shovel. Granted that there is a great majority of Sydney citizens, near European cities, there is also a constant replacement of trees for their commercial value near European cities, there is also a constant replacement of trees, and putting "green gardens" about them by the rich, in the vicinity of the city, and preserving them for all time. But the "forest primeval" hardly exists near European city as it does in the forests of the Amazon, Africa, Southern Italy, and in Macao (China) it has been planted with beneficial results.

One, with a fly vel made at long labour of sections of beech bark suspended by a string, and the other, the boy, who, while he had spoilt for the purpose, told me tales of old times and these present days so interestingly that I have mixed up his story, and the boy, who, I am sure, has been mistreated when I was full."

I was on my way home, when I came from the hotel, and in the temporarily fallen break and wallow in the yellow water, and listened to the night noises, and the rain, and the noise of the wind, and the rain, there was no change. I achieved a backbreaker fever, and lived for five days on quinine and milk, and was chucked into irons.

One day we had rain, and knew that the river had answered "impossible," without being questioned; to find a dreary interest watching for comets, and the rising of the river, or fall of the rock, and gauging from such measurement, the state of the river for 50 miles around; to eat without relish in the city, and the water jug; to regard the clouds narrowly and speculate on the certainty of more rain—while the two-up school was broken, and that the axe must go before the plough or the pick and shovel. Granted that habitats must spread in order to live, but it is necessary to destroy the native trees stock, and barrel? Why cannot a selection be made for preservation, in order to save the trees? The boys who have to earn their bread and butter at an early age, let us have the primary school solid in its teaching of the bread and butter, and the boys who have to earn their bread and butter, and the axe must go before the plough or the pick and shovel. Granted that there is a great majority of Sydney citizens, near European cities, there is also a constant replacement of trees for their commercial value near European cities, there is also a constant replacement of trees, and putting "green gardens" about them by the rich, in the vicinity of the city, and preserving them for all time. But the "forest primeval" hardly exists near European city as it does in the forests of the Amazon, Africa, Southern Italy, and in Macao (China) it has been planted with beneficial results.

One, with a fly vel made at long labour of sections of beech bark suspended by a string, and the other, the boy, who, while he had spoilt for the purpose, told me tales of old times and these present days so interestingly that I have mixed up his story, and the boy, who, I am sure, has been mistreated when I was full."

His features were still expressive of energy;

in muscularity and in face, was Michael Angelo's David, and the hand which was broken was broken.

He was a red-nosed man, who said that his name was Bob McGraw, began to argue on certain geological features of the country, and from the time of his return,

his grievance against all men, because he had been underpaid in a contract for six post holes, or adzed wood, which the two-up school

quarrelled raucously in many languages and their corruptions: a man with metacarpal shaped like waders, and who had a hole in his foot, as though a man as ever went barefoot, "a simile which has come into the language for ever, and will be used by posterity."

BONNINGTON'S IRISH MOSS,

THE MARVELLOUS REMEDY FOR COLDS, BRONCHITIS,
INFLUENZA, WHOOPING COUGH, CROUP, THROAT AND
CHEST AFFECTIONS GENERALLY.

THIS MEDICINE is admirably adapted to promote expectoration, ease the breathing, loosen the phlegm, abate fever, allay the tickling sensation which occasions the cough, and for all local affections, such as wheezing, irritation of the throat, palpitation of the heart, hoarseness of the voice, influenza, &c., it affords a speedy relief; while in more chronic disorders, as periodical coughs or inveterate asthma, it is equally valuable in its effects, though, of course, the longer perseverance in the use of the medicine is required. For the nursery it is invaluable, being agreeable to the palate and useful in all cases of croup, whooping cough, or common cough arising from colds.

NEW ZEALAND RESIDENTS

PRAISE "BONNINGTON'S IRISH MOSS."

READ THE FOLLOWING TESTIMONIALS:-

FROM TE WHAITI, ROTORUA.

I have used your Irish Moss now for years for Coughs and Colds. For children it is the best medicine in the world, easy to take, and safe. I well deserve the name of "Mother" and the people here are never without it in the house.

You can use this, as it is the truth about Irish Moss.

A. M. GRANT, Stockreaper.

FROM WAIMANGAROA.

It gives me great pleasure to recommend your Irish Moss for Coughs and Colds, or any lung complaints, having used it in my family for over twenty years.

I remain, yours truly,

WILLIAM NEIGHBOURS.

FROM MATAURA.

I am pleased to bear testimony to your excellent rough mixture. For several years I have been using it, and had a great deal of success with the fall of the year, and I may say that your Irish Moss has proved a good remedy for all who have used it in recommending it to all who may be suffering from bad colds or influenza.

I am, yours respectfully,

W.M. CARTER.

FROM SYDENHAM, CHRISTCHURCH.

I am writing to you the curative properties of your Irish Moss. I have used it for many years, and for many years for coughs and colds, and we all derive much benefit from taking your Irish Moss.

Yours truly,

ELIZABETH FRENCH.

FROM DUNEDIN.

I beg to say that for children no better cure can be had than your Bonnington's Irish Moss. It gives instant relief, and my children take it before any other remedy. Irish Moss never fails.

Yours truly,

R. WHITBURN.

Remember! "BONNINGTON'S IRISH MOSS" is Always Reliable.

But Be Sure You GET "BONNINGTON'S."

DEVASTATION IN CALIFORNIA. AMERICA'S GREATEST DISASTER.

APPALING LOSS OF LIFE.

ALARMING DEVELOPMENTS IN THE STATE.

MANY TOWNS DEMOLISHED.

CITY OF SAN FRANCISCO SWEPT BY FLAMES.

LONDON, April 20.
Official telegrams show that San Francisco is practically destroyed, and that many towns within a radius of 100 or more miles are in ruins.

There has been appalling loss of life not only in San Francisco but all along the Californian coast, and for a distance of 100 miles inland.

The fires which succeeded the shocks of earthquake early on Wednesday morning raged in San Francisco throughout Wednesday night, and were still sweeping onward on Thursday.

Then it was officially stated that the city had practically been destroyed.

The number of killed in other Californian towns is only estimated, but at one place it was reported that there were 1000 deaths.

LOSS OF LIFE.

The "Daily Mail" publishes a despatch from Oakland (a suburb of San Francisco) stating that 10,000 people had been killed and an equal number injured.

The latest official estimate of deaths is 5000. The damage is estimated at 300,000,000 dollars (about £60,000,000). Hundreds of thousands of people are homeless and in distress.

TOWNS DESTROYED.

The havoc extends everywhere within a 100-mile radius of San Francisco.

The following towns have been destroyed:- Santa Rosa, 67 miles south-west of Sacramento.

Hawardsburg, about 75 miles northward of San Francisco, and 76 miles north-west of Sacramento.

Cloverdale, 75 miles north-north-west of San Francisco.

Doplind, Geiserville, and Ukiah, 110 miles north-north-west of San Francisco.

By the destruction of these towns many people have been killed.

HEAVY MORTALITY.

Wednesday's shocks occasioned heavy mortality at the following places:-

Santa Cruz, 60 miles south-east of San Francisco.

Palo Alto and Napa City, 36 miles from San Francisco.

Monterey, 89 miles south-south-east.

Gilroy, 70 miles south-east.

Hollister, 85 miles south-east.

Spreckels' sugar factory at Salinas, 87 miles to the southward of San Francisco, was destroyed.

At Santa Rosa 1000 people were killed.

An early message stated that many persons perished at Santa Cruz (60 miles south-east of San Francisco), and that 36 people were killed at San Jose (42 miles south-east); also that 10,000 people had been rendered homeless at Santa Rosa.

DRAMATIC INCIDENT.

Two shocks of earthquake were experienced at Los Angeles, 350 miles south-east of San Francisco.

The operator telegraphed: "The office is rocking like a boat—Then the message ceased."

A TIDAL WAVE.

Brigadier-General Funston has been informed that a tidal wave destroyed Terminal Island seaside resort.

The rich are flying to the Bay cities, but the poor are unable to meet the boatmen's exorbitant demands.

PROGRESS OF THE DESTRUCTION.

FIREMEN ABANDON ALL HOPE.

Though many blocks in San Francisco were dynamited throughout Wednesday night, the flames overleapt all obstacles, and the firemen abandoned the hope of controlling the fire.

Brigadier-General Funston, who is in command of the military at San Francisco, telegraphed as follows on Thursday morning:-

"The city is practically destroyed."

"The situation could not be worse."

Brigadier-General Funston wired at 4 o'clock on Thursday afternoon: "There is no change in the progress of the fire."

A private telegram two hours later stated that the fire was spreading over the crest of Nob Hill in a northerly direction towards the Latin quarter.

The commander of the San Francisco Fire Brigade stated on Thursday evening that over two-thirds of the city had been destroyed, and that there was no possibility of saving the remainder.

BLOCKS BURNT OUT.

Guncotton and navy shells were used to destroy premises in the efforts to confine the flames, the supplies of dynamite having become exhausted.

It was decided at noon (Thursday) to dynamite all the residences on the east side of Van Ness-avenue, between the Golden Gate and Pacific avenues, a distance of a mile. This is the most fashionable quarter of the city.

The Fairmount Hotel at Nob Hill, which has just been built, and which cost 8,000,000 dollars (about £600,000), was then blazing.

The Majestic, the Orpheus, the Columbia, and other theatres collapsed, and were burnt.

Many of the richest banks and commercial houses in Montgomery-street were burnt, and hundreds of people were roasted in the debris.

Chinatown and the Japanese quarter are in ruins. They were previously reported to have been destroyed.

Thirty-six Salvation Army buildings, their provincial headquarters, public halls, and industrial institutions have been burnt.

The Government lost stores worth 8,700,000 dollars (about £740,000).

The residences of Messrs. Huntington, Flood, Baldwin, and scores of other millionaires have been burnt.

The newspaper offices combined to issue a single print through the "Chronicle" until that office collapsed.

On Thursday the Merchants' Exchange, Mrs. Stanford's residence, and Mark Hopkins' Institute of Art were burnt. Some pictures were saved.

The fashionable suburbs of Palo Park, Burlingame, and Nob Hill were destroyed.

The Jesuit Church and College of St. Ignatius, which cost 2,000,000 dollars (£400,000), have been demolished.

Cliff House, a pleasure resort, has been swept into the sea.

Most of the towns around the Bay suffered; but according to an early message only five people were killed at Oakland, which is about five miles from San Francisco.

SERIOUS RIOTS.

CHINESE AND FOREIGNERS PANIC-STRIKED.

When the disaster occurred the Chinese in Chinatown were seized with a fearful panic, and rushed into the streets, beating gongs.

They came into collision with other foreigners, and fierce fighting took place.

Ten thousand frantic Chinese and thousands of Italians, Spaniards, and Mexicans fought until the soldiers restored order.

The troops suppressed the disturbance at the point of the bayonet.

A HOSPITAL BURNED.

The hospital was burnt, only 10 out of 100 injured being saved, owing to the swift advance of the fire.

The Mechanics' Pavilion was temporarily converted into a morgue.

WORK OF RELIEF. NEWS BY PACIFIC CABLE

WIDESPREAD DISTRESS IN THE CITY.

HUNDREDS OF THOUSANDS HOMELESS.

Brigadier-General Funston has telegraphed to President Roosevelt: "Two hundred thousand are homeless."

"Food and tents are scarce."

"All the Government buildings are destroyed."

Famine is feared, since the city has never had beyond three days' supply.

Prices have trebled.

The people are still half-dazed, but they are remarkably calm.

One hundred thousand people passed Wednesday night in the park, and there were probably 300,000 there on Thursday.

The want of food and water is causing suffering.

Thousands are waiting whilst the soldiers distribute water.

The sale of food is regulated, and the rich are prevented from buying largely.

FOREIGN VISITORS SAFE.

Reuter's Agency reports that it is impossible to trace individuals in the present confusion, but that Englishmen and foreigners staying at big hotels are doubtless safe.

The casualties so far, Reuter states, have been confined to the poorer tenement section.

Two lady millionaires, leaders of the New York society, have been ruined, their property at San Francisco not having been insured.

Mrs. Hermann Oelrichs and Mrs. W. K. Vanderbilt (probably the ladies referred to above) fear that they have been ruined owing to their property not being insured.

PRESIDENT'S APPEAL.

President Roosevelt has appealed for private contributions.

Wall-street has suspended business to arrange for relief.

J. D. Rockefeller gave 100,000 dollars (about £20,000) towards relief, and other enormous contributions have been received.

The railways are conveying supplies free.

Congress has voted 1,000,000 dollars for relief, and has ordered the distribution of army rations.

The authorities are also sending large supplies from Portland and Seattle, and have ordered several warships to co-operate.

Many English organisations are contributing liberally towards relief.

Help is arriving from all directions.

LOOTERS SHOT.

Looting is rampant, despite the death penalties. A sailor bayoneted one thief. Four other looters have been shot.

SURVIVALS OF THE DISASTER.

The employees made desperate efforts and saved the Mint (which a previous message stated was on fire) from burning. It contained \$60,000,000 dollars (about £12,000,000).

The Pacific and Saint Francis Hospitals and the College of Physicians were saved by dynamiting all the surrounding buildings.

THE LATE FIRE BRIGADE CHIEF.

The late Mr. Denis T. Sullivan, chief of the San Francisco Fire Brigade, who was killed by falling buildings, had been a fireman for over 30 years. He was an exceedingly popular and well-liked man, and had been a resident of San Francisco since 1874. A couple of years after his arrival there he became a member of the Fire Department, and he rose in a few years to be district engineer. For several years he was assistant to the chief of the Department, and on the death of the chief, Mr. David C. Hall, in 1893, he was called upon to succeed him. In every emergency he always showed himself resourceful, resourceful, prompt and ready in action, and a kind, but strict, disciplinarian.

FIRES STILL RAGING.

ENTIRE CITY DOOMED.

WELLINGTON (N.Z.). Friday.

The general manager of the Pacific Cable, who is now here, has received the following cablegram:-

The last bulletin from San Francisco says that the fire is still raging, and the entire city is doomed.

Every building in the business district and nearly half the residential section have been destroyed. There is no large building now standing.

The greatest loss of life was south of Market-street.

Six hundred bodies have been recovered.

St. Agnes Insane Asylum has been destroyed with the majority of the inmates.

Reports received from the interior are alarming.

OFFICIAL CABLEGRAMS.

TELEGRAPHIC INTERRUPTIONS.

The Acting Deputy Postmaster-General has received the following information from Bamfield Creek (B.C.):-

3 a.m.-"Vancouver advises no outlet to San Francisco. San Jose, or Oakland; all other California points subject to heavy delay."

The Acting Deputy Postmaster-General has received the following communication:-

"Santa Barbara: In consequence of the earthquake, telegrams for San Francisco will only be accepted at senders' risk."

PERTH OBSERVATORY RECORDS.

WESTERN AUSTRALIAN SEISMOGRAPH AFFECTED.

PERTH (W.A.), Friday.

The Government Astronomer, Mr. Cooke, says:—"The seismograph at the Perth Observatory recorded two distinct seismic waves on the 17th instant, which were received at 10.38 on Wednesday evening, or 20 minutes later than the cabled time of the San Francisco earthquake. The seismograph is teaching it something new. The wave was recorded at 10.38 p.m. on Wednesday evening, and at 10.58 p.m. on Thursday evening. The seismograph, which is a scientific instrument, has recorded nearly all seismic disturbances of the world up to date. The idea of recording records with what is called a seismograph is to establish the exact time at which the disturbance occurred in America should be known. The seismograph gives no indication of the intensity of the shock. The instrument, in Mr. Barachia's charge, has recorded nearly all seismic disturbances of the world up to date. The idea of recording records with what is called a seismograph is to establish the exact time at which the disturbance occurred in America should be known. The seismograph gives no indication of the intensity of the shock. The instrument, in Mr. Barachia's charge, has recorded nearly all seismic disturbances of the world up to date. MONETARY AND COMMERCIAL.

STOCKS AND SHARES.

Business again proved slack on the Sydney Stock Exchange yesterday, the number of sales effected being considerably above the average. Prices, however, did not vary to any marked extent. In Government stock shares New South Wales 4 per cent. had advanced to £102 10s., while New Zealand 10 per cent. debentures (1921) moved up 10s. Bank shares showed some moderate tendency, National Bank of Australia and Commercial Banking Company of Sydney shares were operating at 75s 6d and £29 respectively. Union Bank shares had a rise of 5s. Queensland National Bank (inscribed) shares found a buyer at a slightly higher figure. Steam shares also had a fall, attention, however, being directed to a slight better value.

The following sales were reported:—Early:

N.L. On Change: N.S.W. 4 per cent. Funded Stock, 1912, or later, £102 10s.; A.J.S. Bank "B" Deposits, 13s 2d; Fresh Food and Ice, 10s; Colonial Sugar, 24s 6d; Later: Castlemaine Brewery and Woods Bros., 10s; Sydney Ferries, 12s 2d; Australian Capital, 75s 6d; National, 10s; Commercial Banking Company, 12s 2d; Later: A.J.S. Bank "B" Deposits, 13s 2d; Fresh Food and Ice, 10s; Walmsley, 10s; Later: Adelaide Steamship, 2s 6d; Queensland Steam, 2s 6d; Queensland National Bank, inscribed, £104; Newcastle Coal, £3 15s.; New Zealand Government 4 per cent. debentures (1921), £102; Union Bank, £101 15s.

Closing quotations were:—

| Company | Capital | Paid up | Amount of Shares | Price | Buyer | Seller |

THE COUNTRY CALLS YOU BACK.

BUT HAVE YOU BEEN ALL YOU CAN DO DOWN TO SEE?

There was that master build or building and repairing your home. You remember you promised your self to see what was later in life, and now you have done it. Well, Wunderlich's Showrooms are where you want to visit. You can see there what is first in art, in science, and best in workmanship. The address is:

66 PITT STREET, Sydney.

WUNDERLICH'S are Specialists in every branch of their business. There is nothing you can suggest to beauty a house inside or out that they have not anticipated in their Metal ceiling, cornices, walls, etc. All parts are of exquisite design, and they could not be sold for anything like the price were it not for the fact that the material has been eliminated, and you buy direct from the factory. You are your own agent, you make your own selection, and you benefit accordingly.
